TASK-1: Design a food ordering interface with restaurant details, menu categories, food images, prices, special offers, customer reviews, and order buttons. Use card layouts, attractive backgrounds, and mobile-friendly navigation

Explanation:

The Online Food Ordering Website provides an attractive interface for exploring food items and restaurant information. It displays food images, menu categories, prices, special offers, and customer reviews. The website uses card layouts, warm colors, and responsive navigation to make browsing food items convenient on desktop and mobile devices.

HTML TAGS USED

Tag	Purpose
<html>	Defines the HTML document.
<head>	Contains metadata, the page title, and the CSS link.
<title>	Specifies the website title shown in the browser tab.
<link>	Connects the external CSS stylesheet.
<body>	Contains the visible website content.
<header>	Displays the restaurant name and tagline.
<nav>	Provides navigation links to menu, offers, and reviews.
<a>	Creates navigation links and order buttons.
<section>	Separates the menu, offers, categories, and reviews.
<h1>, <h2>, <h3>, <h4>	Display headings and food item names or prices.
<p>	Displays food descriptions and restaurant details.

Tag	Purpose
	Groups food cards, categories, and review panels.
<img>	Displays food photographs.
<footer>	Displays contact information and copyright details.

CSS TAGS USED

. **background** – Adds attractive background colors.

. **color** – Sets text colors.

.**font-family** – Defines the text font.

. **display: flex** – Arranges food cards in rows.

. **flex-wrap** – Moves cards to the next line when necessary.

. **gap** – Adds space between food cards.

.**width and height** – Set card and image dimensions.

.**object-fit: cover** – Fits images into their containers without stretching them.

. **border-radius** – Gives cards rounded corners.

. **box-shadow** – Creates depth around food cards.

.**hover** – Changes an element's appearance when the pointer moves over it.

.**media** – Makes the website responsive on

TASK-2:Travel Portal Website

Statement: Develop a responsive Travel Portal Website that provides information about holiday packages, popular tourist destinations, trip durations, package prices, travel itineraries, and travel inquiry forms. The website uses attractive destination cards, beautiful hero images, navigation menus, and user-friendly layouts to help customers explore destinations and plan their trips easily.

Explanation: **The** Travel Portal Website is designed to help users discover and plan their holidays online.

The website includes the following features:

1. Home Page: Displays a welcome message with an attractive background image.
2. Popular Destinations: Shows famous tourist places with images and descriptions.
3. Holiday Packages: Displays different travel packages with prices and trip durations.
4. Trip Itinerary: Provides day-wise travel plans and activities.
5. Travel Inquiry Form: Allows users to enter their name, email, destination, and travel details.
6. Responsive Design: Adjusts the website layout for desktops, tablets, and mobile phones

TASK-3:

Statement: Develop a responsive Yoga and Meditation Website that provides information about yoga poses, meditation techniques, instructor profiles, class schedules, membership plans, and wellness articles. The website uses calming colors, readable typography, attractive images, and responsive layouts to create a peaceful and user-friendly experience.

Explanation:

The Yoga and Meditation Website helps users learn yoga, practice meditation, and improve their overall wellness.

The website includes the following features:

1. Home Page: Displays a welcome message with a peaceful yoga background image.
2. Yoga Poses: Shows different yoga poses with images and descriptions.
3. Meditation Techniques: Provides information about breathing exercises and meditation methods.
4. Instructor Profiles: Displays yoga instructors and their experience.
5. Class Schedule: Shows available yoga and meditation class timings.
6. Membership Plans: Displays different membership packages and prices.
7. Wellness Articles: Provides health, fitness, and meditation tips.

8. Responsive Design: Adjusts the website for desktop, tablet, and mobile devices.
